Experienced full stack web developer using Javascript, committed to maintaining cutting edge technical skills and up-to-date industry knowledge. Always ready to learn and teach new technologies and languages.

WORK EXPERIENCE

Full Stack Developer
Tata Consultancy Services

10/2016 – 07/2017   *Mumbai, India*

Because of good programming skills, got transferred from tester role to full stack web developer and later I started working in Javascript.

Involved in following tasks

- Web Designing using html5, css3, javascript, jquery, chart.js, and bootstrap.
- Working on one innovation project using Nodejs, Express, React and Redux.
- Handling Server using Amazon AWS, HA Proxy, Centos, Mooshak.
- Database management using PostgreSQL and Eclipse database tools.
- Creating Web Services using Eclipse, Java Servlets, JSP, Jersy.
- Using dev tools like Git, SSH, SCP, etc

Assistant System Engineer
Tata Consultancy Services

10/2015 – 09/2016   *Hyderabad, India*

Completed training in Java EE and Automation Testing tools and started with Automation Tester Role.

Tasks/Achievements

- After completion of training, I got selected for Learning Enabler Role where I was assigned the task of teaching new trainees in relevant fields.
- Created C# tools (Lead myself) for client that help in automation of functional testing which was going on manually at project's onshore.
- Got appreciation for above task and saved more than $ 6000 of client by automating most of things.
- Worked in Innovation Lab to develop new creative application that will help in company's internal working and process flow. Developed 3 Java web applications that are deployed in production Successfully.
